1030-32-177   **Harold P. Boas*** (`boas@math.tamu.edu`), Department of Mathematics, Texas A&M University, College Station, TX 77843. *Remarks on overconvergence.* Preliminary report.

One hundred years ago, M. B. Porter discovered the phenomenon of overconvergence of power series in one complex variable. I shall discuss some problems in multi-dimensional complex analysis that appear to be unrelated to power series but that nonetheless can be phrased in the language of overconvergence.
