Box 7388, Winston-Salem, NC 27109, **Chelsea Walton***, Department of Mathematics, Cambridge, MA 02144, and **James Zhang**, Department of Mathematics, Box 354350, Seattle, WA 98195. *Quantum binary polyhedral groups and their actions on quantum planes.*

We classify quantum analogues of finite subgroups of $SL_2(k)$, and study their actions on Artin-Schelter regular algebras of global dimension two. (Received August 21, 2012)
