

1114-97-139      **Joshua H Park\*** (jpark1050@gmail.com), 13342 Portal, Tustin, CA 92782. *Selected Problems from the Fullerton Mathematical Circle*. Preliminary report.

This presentation includes a few solutions given to interesting problems posed during the Fullerton Mathematical Circle's sessions. One of the questions explores a best constant double inequality inspired from the study of the ladder of means and of the Engel's Lemma. The other solutions reflect the author's interest in various problem solving strategies in algebra. (Received August 21, 2015)
