**Daniel Maroncelli** and **Jesus Rodriguez\*** ([rodrigu@ncsu.edu](mailto:rodrigu@ncsu.edu)). *Existence theory for nonlinear Sturm-Liouville problems with unbounded nonlinearities.*

In this work we provide conditions for the existence of solutions to nonlinear Sturm-Liouville problems of the form,

$$(p(t)x'(t))' + q(t)x(t) + \lambda x(t) = f(\varepsilon, x(t))$$

subject to

$$ax(0) + bx'(0) = 0 \text{ and } cx(1) + dx'(1) = 0.$$

Our approach will be topological, utilizing both degree theory and the Lyapunov-Schmidt procedure. (Received September 21, 2014)
