1107-60-482   **Jonathan C Mattingly*** (`jonm@math.duke.edu`), Mathematics department, Physics building, science drive, Durham, NC 27701. *Absolute Continuity for SPDEs.*

I will discuss how the fine scale structure of a class of SPDEs can be determined by proving absolute continuity relative to a simpler SPDE. I will use the 2D navier stokes equation (and related systems) as my motivating example. (Received January 20, 2015)
