**Peter Lindqvist** and **Juan J Manfredi\*** ([manfredi@pitt.edu](mailto:manfredi@pitt.edu)), Department of Mathematics, University of Pittsburgh, Pittsburgh, PA 15260. *On the Mean Value Property for the  $p$ -Laplace equation in the plane.*

We study the  $p$ -Laplace equation in the plane and prove that the mean value property holds directly for the solutions themselves, at least for  $1 < p < 9.5$ . This removes the need to interpret the formula in the viscosity sense via test functions. The method is based on the hodograph representation (Received November 02, 2014)
