1161-13-292   **Haydee Lindo*** (`hlindo@hmc.edu`). *Trace Modules and Rigidity.* Preliminary report.

I will speak on some recent developments in the theory of trace modules over commutative Noetherian rings. This will include applications of trace modules in understanding endomorphism rings and a discussion of ongoing work examining the relationship between trace ideals and modules having no self-extensions. (Received August 18, 2020)
