Two-weight Tb Theorems for Well-localized Operators.

In this talk, we will discuss a two-weight Tb theorem for operators that are, in some sense, “well localized” with respect to a pair of accretive functions $\{b_1, b_2\}$. Time permitting, we will also discuss a similar result for operators that are “well-localized” with respect to a pair of accretive systems. (Received August 16, 2021)
