Roger Casals* (casals@math.ucdavis.edu), 1 Shields Ave, Davis, CA 95616. *Lagrangian Fillings: A Quick Review*. Preliminary report.

I will discuss my current understanding on the classification of Lagrangian fillings for Legendrian knots in the standard contact 3-sphere. First, I will introduce the basic objects and problems of interest. Second, a quick survey of the developments that have taken place this last year will follow. Then, I will discuss work-in-progress complementing and expanding some of these results, and state some open questions and related conjectures. (Received February 10, 2021)
