**Milagros Izquierdo\*** ([milagros.izquierdo@liu.se](mailto:milagros.izquierdo@liu.se)). *Regular Maps with Large Symmetry*.

In this talk we present infinite families of regular maps and hypermaps admitting rotational groups of order larger than  $4g - 4$ , with  $g$  the genus of the map. We will focus in maps with rotational group of order  $4g$ . (Received January 24, 2022)
